SCOR Working Group 168 Webinar #12

Title: The intricacies of BGC-Argo data and how to bypass them with the EasyOneArgo data product

Presenters:

Catherine Schmechtig

CNRS

&

Annie Wong

Scripps Institution of Oceanography

BGC-Argo data are complex. In this joint presentation, Catherine will give an overview of the intricacies of BGC-Argo data and their adjustments, which involve multiple data modes and quality control flags. The various ways to access BGC-Argo data will also be presented. Annie will then introduce the data product called EasyOneArgo, which is designed to provide users with good BGC-Argo data in a simple manner.

Webinar Series Information

The [4D-BGC Working Group](#) seeks to enhance access and utility of Biogeochemical (BGC) Argo observations through four-dimensional (4D) data products. These advanced data products aim to refine our understanding of ocean biogeochemistry, improve biogeochemical models and reanalysis products, and provide valuable insights for policy-making. The goal of this webinar series is to introduce new and in-development BGC data products, review techniques used to develop data products from in situ observations, and to explore ways in which 4D-BGC products are leveraged to answer scientific questions.
